

What devices and Browsers enable the Video Function?

Devices:

- The Video Function works on all devices **except** mobile phone
- The Video Function works best on desktop and laptops
- For iPad: Safari browsers 12.1. This is available on iOS 12.2 and above. To have video calls on your iPad, upgrade your iPad to the latest version
- For INDIVIDUALS: video call works on all devices including mobile

Browsers:

- Google Chrome (latest release version) — [HTTPS only](#)
- Google Chrome for Android (latest release version) — [HTTPS only](#)
- Firefox (latest release version)
- Firefox for Android (latest release version)
- Internet Explorer 11 with the OpenTok Plugin for Internet Explorer
- Microsoft Edge. Full support for Chromium-based versions of Edge (version 79+), and beta support for non-Chromium versions of Edge (version 17+)
- Safari 11 on macOS and Safari on iOS 11. For information on video interoperability and other issues, see the [Safari browser support](#) page
- Opera (latest release version)
